Date	13.9.18	Agenda item	Bo.9.18.14

NHS England (NHSE) Public Health Screening Reports

1 PURPOSE/ AIM

The Board of Directors is required to review and approve the submission of the Public Health screening reports to NHSE.

2 BACKGROUND/CONTEXT

The Trust provides screening services in the following areas:

- Antenatal & Newborn Screening Programme
- Bowel Cancer Screening
- Breast Screening
- Cervical Cancer Screening

These services are commissioned by NHS England via NHS England - North (Yorkshire and the Humber) Public Health (NHSE PH). As part of the contract for these services the Foundation Trust is required to submit annual reports to NHSE PH providing background to the service and detailing areas of achievement in the year, areas for development, areas of concern and actions to be taken. The reports therefore provide an ongoing assessment of the quality of the delivery of the six screening programmes using defined standards identified. They provide a benchmark for future service planning and a direction for quality improvement initiatives.

3 PROPOSAL

The required suite of annual reports is provided in the appendices to this paper. These relate to the screening services provided by the Trust. The reports provide details of areas of concern, areas for improvement and key achievements. The actions developed to address these should be monitored by the Clinical Audit and Effectiveness Committee on behalf of the Quality Committee.

4 RISK ASSESSMENT

Any risks identified through the analysis undertaken to support the annual report are being assessed as the action plans to address any concerns are being developed. At present the risk to the quality of care provided is identified as being low. This will be monitored through the Clinical Audit and Effectiveness Committee.

5 RECOMMENDATIONS

- The Board of Directors is requested to approve the submission of the screening reports to NHSE PH
- The actions identified to mitigate any risks identified in the reports should be monitored by the Clinical Audit and Effectiveness Sub-Committee on behalf of the Quality Committee.
- The Quality Committee should receive an update paper in relation to the delivery of the improvement action plans in February 2019.

6 Appendices

Appendix 1: Antenatal & Newborn Screening Programme

Appendix 2: Bowel Cancer Screening

Appendix 3: Breast Screening

Appendix 4: Cervical Cancer Screening
