Key Options, Issues and Risks

The Integrated Governance and Risk Committee provides a governance infrastructure for review and challenge associated with the management of and mitigation of risks being managed within the Corporate Risk register. This report provides, by exception, risks on the corporate risk register which were subject to active consideration and decision making, with the rationale for that consideration and the outcome of the decision making at the Committee meetings (See Appendix 1). In addition the significant risk profile (Appendix 2) provides Directors with details on all identified significant risk exposures throughout the Trust.

Analysis

All corporate risks are subject to a monthly review and have been reviewed by the Integrated Governance and risk Committee in line with its terms of reference on two occasions (September and October 2018) since the last meeting of the Board. The Trust has identified a range of significant risks, which are currently being mitigated, whose impact could have a direct bearing on requirements within the NHS Improvement Accountability Framework, CQC registration or the achievement of Trust policies, aims and objectives should the mitigation plans be ineffective. Currently, the significant risks relate to the following principal risks:

No	Principal risk	Significant risks being mitigated
1	Failure to maintain the quality of patient services	▪
2	Failure to recruit and retain an effective workforce	▪
3	Failure to maintain operational performance	▪
4	Failure to maintain financial stability	▪
5	Failure to deliver the required transformation of services,	▪
6	Failure to achieve sustainable contracts with commissioners	▪
7	Failure to deliver the benefits of strategic partnerships	▪
8	Failure to maintain a safe environment for staff, patients and visitors	▪
9	Failure to meet regulatory expectations and comply with laws, regulations and standards	▪
10	Failure to continually learn and improve the quality of care for our patients
