

Video Call Appointments

You can now have your appointments on video call through the internet.

Video calling is like a phone call but you can see your doctors/nurses face.

This might make you feel more comfortable during your appointment.

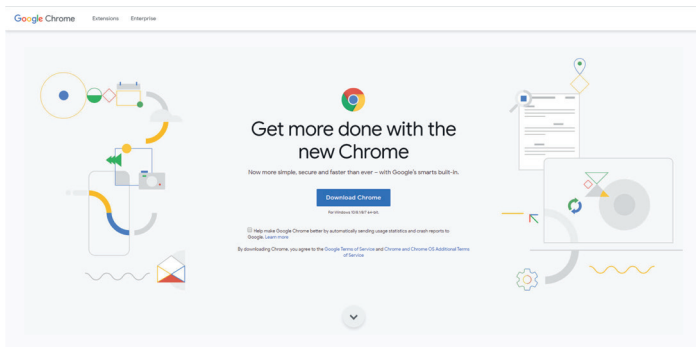

It could save you time and money because you will be having your appointment from home.

What do I need for a video call appointment?

You need a smart phone, laptop, computer or tablet and a Wifi connection.

On your device, you must have either Google Chrome or Apple Safari web browsers.

Make sure your camera, microphone and speakers are switched on for the call.

Make sure you are in a quiet room where you will not be disturbed by anyone.

How to do I do a video call appointment?

If you are asked to do this the trust will contact you on how to set it up.

You don't need to make an account and we won't store any information that you enter.

Click 'start video call' and wait in your private video call room.

Start Video Call

The person you have your appointment with will see that you are online and join the video call.
