

Prescribing Patient Controlled Analgesia (PCAS) on EPR

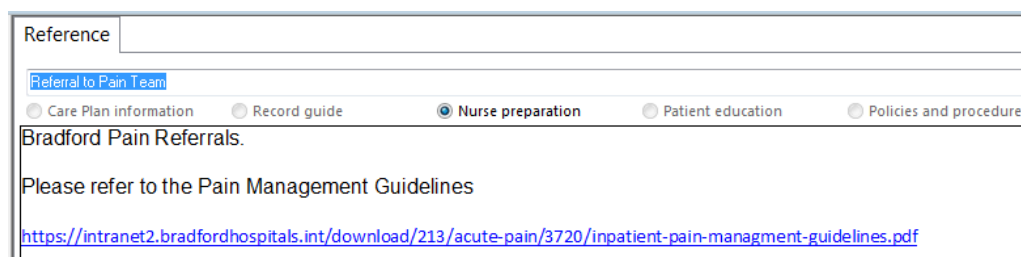

1. Prescribe PCAS on EPR only, do not use the yellow Pain Management chart.
Requests / Care Plans Add+ type 'patient' select the Care Plan

2. The PCA Care Plan includes the pain observation charts, additional drugs including naloxone and oxygen, and options for type of PCA. Make the appropriate selections.

3. Make a Pain Team referral on EPR to ensure a pain team review.
Requests / Care Plans Add+ type 'Referral to Pain Team'
The first screen you will see will give you the option of clicking the link to the Acute Pain Management Guidelines. You may bypass this by clicking 'OK'

Fill in the referral form as follows:
 Referral service – Anaesthetics
 Priority – Urgent
 Reason for referral – PCA, Epidural, etc
 Clinician requested – please leave this blank

Then submit the form
