

# ATAIN Action Plan

Description	Lead	Date Assigned	Scheduled completion	Status	Actual Completion	Comments
Re-engage and/or re-appoint ATAIN champions from NNU, Labour Ward, Birth Centre, M4 and M3 and involve in education and risk management in term babies within their areas	Catriona Firth / Amanda Hardaker	12/10/2021				Rhianna Dyson (NNU), Jo Taylor (LW), Ruby Lusher (BC), Katy Luty (M3) and Stacey Hardaker (M4) appointed a few months pre-covid and before opportunity to see how this team would work. Aware some have now moved/or are moving on. Needed to raise ATAIN profile.
Further promotion and sharing of learning points from ATAIN via poster  Produced 6 monthly including during COVID-19 times.	Catriona Firth	Beginning of ATAIN project	Ongoing		Ongoing	Report shared June 2021.  To re-time to fit with quarterly reports.
Continue to monitor compliance with maintaining newborn temperature via NEWTT chart and (indirectly) via no. of babies admitted with temp below target range	Jo Stubbs  Catriona Firth	October 2021	Ongoing		Ongoing	Work on NEWTT documentation has taken priority and includes thermoregulation  Once new documentation is embedded to re-visit temperature if needed
Atain e-learning for midwifery staff to increase knowledge base on importance of maintaining normothermia.	Carly Stott  Catriona Firth  Vanessa Nutter	November 2020	November 2021			Atain e-learning felt too time consuming to be mandatory  Agreement for presentation at PROMPT courses – CF to re-edit slides produced by VN as currently too long
Development of improved documentation to help record response to clinical or parental concerns	Jo Stubbs  Catriona Firth		2021		Complete and updated July 2021 in accordance with NICE infection	NEWTT chart implemented May 2021.  Left on action plan as need to ensure reproducible on EPR.

## ATAIN Action Plan

					guideline.	
Improvement in parental access to TCU in response to previous audit findings during covid-19 pandemic	All staff TC and M4	Ongoing	Ongoing		Ongoing	Ongoing discussion on case by case basis to ensure families can be supported in the TCU setting
Increase awareness of hypoglycaemia pathway and use of buccal dextrose – education provision for MWs	Catriona Firth  Rea Halstead	October 2021	December 2021			In response to cluster of incidents relating to hypoglycaemia pathway and buccal dextrose use
Assess potential use of decision support tool for babies with signs of respiratory distress to see whether appropriate to use in Bradford	Catriona Firth plus junior trainees	October 2021	March 2022			Respiratory concerns make-up biggest group of admissions. Often without obvious learning from cases. Aware other units have used a tool to standardise assessment of such babies, unclear whether this will be of use in Bradford.
Develop and embed practice to record data of babies 34-36+6 to monitor no. special care days where O2 not delivered (as per Safety Action 3 requirements)	Catriona Firth  Catherine Gardiner	September 2021	December 2021			Contacted Badger team to see whether this can be an automated report.  Info regarding these babies including in Q2 report.
