

MSDSv2 Plan

Trust:	Bradford Hospitals Foundation trust
Key Contact:	Sara Hollins
Number of records submitted in December 2020:	76,236
Number of records rejected in December 2020:	18,208
Are plans fully funded? i.e. are relevant departments sufficiently resourced to achieve these plans?	Yes

This MSDSv2 update is to be discussed by the WY&H LMS Board on the 19th November. Please submit to Duncan.Cooper4@nhs.net before the 5th of November 2021.

This plan relates to CNST safety action 2 criterion 3:
Trust Boards to confirm to NHS Resolution that they have fully conformed with the MSDSw2 Information Standards Notice, DCB1513 and 10/2018, which was expected for April 2019 data, or that a locally funded plan is in place to do this, and agreed with the maternity safety champion and the LMS. This should include submission of the relevant clinical coding in MSDSw2 in SNOMED-CT.

Information Standards Notice. DCB1513 And 10/2018 can be found by clicking this box

	Y/N	If no, what actions need to be undertaken to submit SNOMED-CT clinical coding?	If no, when will relevant clinical coding be submitted in SNOMED-CT?
Is clinical coding submitted in SNOMED-CT where relevant?	Y		

Submission of MSDSv2 Tables - ORIGINAL May 2021

MSDSv2 Tables	Is this table currently submitted and will continue to be submitted? (Y/N)	If not submitted, what actions need to be undertaken for this table to be submitted?	If not submitted, when is this table planned to be submitted?	Is this table currently submitted and will continue to be submitted? (Y/N)	If still not submitted, have the required actions changed? If yes, please list revised actions:	Has the planned delivery date changed? If yes, please include revised date:
MSD000 Header	Y			Y		
MSD001 MotherDemog	Y			Y		
MSD002 GP	Y			Y		
MSD003 SocPersCircumstances	Y			Y		
MSD004 OverseasVisChargCat	Y			Y		
MSD101 PregnancyBooking	Y			Y		
MSD102 MatCarePlan	Y			Y		
MSD103 DatingScan	Y			Y		
MSD104 CodedScoreAssPreg	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Currently low figures produced from the data source, needs further investigation including if all SNOMED mapping correctly configured)	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data.	Y		
MSD105 ProvDiagnosisPreg	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Currently low figures produced from the data source, needs further investigation (including if SNOMED mapping correctly configured). Currently low figures would be integrated due to Diagnosis Date not being populated that would prevent integration of the data need to investigate data further. Also restriction around LocalFetalID would prevent integration, need to investigate data further and verify if uniqueness of record can be established without LocalFetalID. Also needs confirmation of SNOMED mapping.	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data. Although largely dependent on data investigation	Y (Small dataset produced from Medway)		
MSD106 DiagnosisPreg	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Currently low figures produced from the data source, needs further investigation [e.g. is all SNOMED mapping correctly configured). Currently low figures would be integrated due to Diagnosis Date not being populated that would prevent integration of the data need to investigate data further. Also restriction around LocalFetalID would prevent integration, need to investigate data further and verify if uniqueness of record can be established without LocalFetalID. Also needs confirmation of SNOMED mapping.	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data, however it is important to recognise that further investigation is required around data quality in regards to the fetal ID and understanding why the diagnosis date is not supplied. Although largely dependent on data investigation	Y (Small dataset produced from Medway)		

MSD107 MedHistory	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Currently low figures produced from the data source, needs further investigation (e.g. is all SNOMED mapping correctly configured). Currently low figures would be integrated due to Diagnosis Date not being populated that would prevent integration of the data need to investigate data further. Also restriction around LocalFetalID would prevent integration, need to investigate data further and verify if uniqueness of record can be established without LocalFetalID. Also needs confirmation of SNOMED mapping.	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data. Although largely dependent on data investigation	Y (Quite small dataset produced from Medway)		
MSD108FamHistBooking	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Needs confirmation of SNOMED mapping.	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data.	Y		
MSD109FindingObsMother	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Currently low figures would be integrated due to restriction around LocalFetalID. Need to investigate data further and verify if uniqueness of record can be established without LocalFetalID	Plan for Data warehouse team to integrate and validate data for inclusion - May Flex, April Freeze Data. Further investigation is required around data quality in regards to the fetal ID.	Y		
MSD201CareContactPreg	Y			Y		
MSD202CareActivityPreg	Y			Y		
MSD203CodedScoreAssContact	N	Not submitted, previously no weekly source in place. While we now have a data source, this dataset has not currently been integrated. Needs confirmation of SNOMED mapping.	Plan to integrate this data in May Flex, April Freeze.	Y		
MSD301LabourDelivery	Y			Y		
MSD302CareActivityLabDel	Y			Y		
MSD401BabyDemographics	Y			Y		
MSD402NeonatalAdmission	Y			Y		
MSD403ProvDiagNeonatal	N	Information system, however if no Neonatal Diagnosis is suspected no data will be added to this field by the end user. Further investigatory work is required to understand if SNOMED-CT codes are mapped. It is unknown if these issues can be resolved. Plan for the data warehouse, Business Intelligence and Digital midwife to work towards rectification however it should be recognised that BTHFT are moving to another Maternity information system provider March 2022 and previous provider is has completed the last update for amendments in the system.	Unable to give clarification on date - weekly meetings are in place to address.	Y (However, such small volumes and low data quality that the table appears empty on extract)	This has been addressed with new system supplier. Mapping has been agreed to SNOMED-CT codes the trust believe are relevant as no requirements are published in the TOS. This has been raised with Colleagues at NHSD who have supplied an extract of what other organisations are submitting for this table.	
MSD404DiagnosisNeonatal	N	Information system, however if no Neonatal Diagnosis is suspected no data will be added to this field by the end user. Further investigatory work is required to understand if SNOMED-CT codes are mapped. It is unknown if these issues can be resolved. Plan for the data warehouse, Business Intelligence and Digital midwife to work towards rectification however it should be recognised that BTHFT are moving to another Maternity information system provider March 2022 and previous provider is has completed the last update for amendments in the system.	Unable to give clarification on date - weekly meetings are in place to address.	Y (However, such small volumes and low data quality that the table appears empty on extract)	This has been addressed with new system supplier. Mapping has been agreed to SNOMED-CT codes the trust believe are relevant as no requirements are published in the TOS. This has been raised with Colleagues at NHSD who have supplied an extract of what other organisations are submitting for this table.	
MSD405CareActivityBaby	Y			Y		
MSD501HospProvSpell	Y			Y		
MSD502HospSpellComm	N	This extract is not currently populated by the Inview MSDS extract, this is likely due to the configuration of the Inview in relation to the P&R process not populating an Inview table that drives the Inview MSD502 dataset.	Would need further clarification with the supplier (CACI). Unable to give time frame until this clarification is received.	N (The required table driving this dataset is not populated in Inview Data Warehouse)	The move to Maternity EPR will not cause population of this dataset, as the root cause of no data in this extract is the fact table in Inview is not populated during the load of the Inview Data Warehouse.	
MSD503WardStay	Y			Y		
MSD504AssignedCareProf	Y			Y		
MSD901StaffDetails	Y			Y

CQIM DQ - ORIGINAL May 2021 Actions and timeline

Update for LMS Board November 2021

Indicator	June 2021 Pass/Fail Data	If passed, please confirm that data to support this CQIM will continue to be submitted. If not passed, what actions need to be undertaken for this data to be submitted at a high enough data quality?	If not passed, when will the relevant data items be submitted at the required data quality?	If not passed, what actions need to be undertaken for this data to be submitted at a high enough data quality?	If not passed, when will the relevant data items be submitted at the required data quality?
CQIMAppar	Pass	CQIMDQ24- Percentage of babies with an Apgar score recorded between 0-10 and a valid gestational age between 259 days (37wks) and 315 days (45wks) in the current 3 months reporting period (Singleton) - btfht first submission of this Data was for the Dec 2020. Data is now published monthly so this CQIM should be achieved in the next reporting period.	First submission was December 2020 and plan to continue to Submit.		
CQIMBreastfeeding	Pass	This data will continue to be submitted.			
CQIMPPH	Fail	data. Data warehouse team to confirm that the correct SNOMED-CT codes are mapped. We are likely to continue to fail this CQIM due to the required 6 month recorded data.	First submission was December 2020 and plan to continue to Submit.	CQIMDQ10/11/12 - All Passed CQIMDQ13 - Failed - July Data submitted 12 cases off PPH over 1500mls in the required format.	Addition of PPH SNOMED mapping (719051004) for "Blood Loss" in Medway will result in data published in MSD302 for Aug Freeze and Sep Flex
CQIMPreterm	Pass	This data will continue to be submitted.			
CQIMRobson01	Pass	This data will continue to be submitted.			
CQIMRobson02	Pass	This data will continue to be submitted.			
CQIMRobson05	Pass	This data will continue to be submitted.			
CQIMSmokingBooking	Unknown	From system supplier, this configuration can not be completed locally and the System supplier will need to complete this work. Relates to 101 table - (Care contact date & antenatal booking date need to be the same however due to current pathway for a proportion of women (pre-booking appointment with a maternity support worker and the remainder of antenatal completed with the Midwife) the current workflow within the MIS does not support this and impacts on the data. This has been raised with NHS digital for clarification). This pathway of care has been raised by the Cerner maternity project team to ensure the new MIS supports this.	Unable to provide assurance on the date when this data will be submitted due to reliance on MIS provider. Support call requested with system supplier -26th April 2021.	NHSD still to publish requirements. We currently submit SNOMED-CT codes for smoking status/Cigarette consumption/CO reading as part of MSD202. Date derived measure = MSD101/MSD303 Date.	

CQIMSmokingDelivery	Unknown	From system supplier, this configuration cannot be completed locally, the System supplier will need to complete this work. Relates to 203- Care contact date > onset of labour). Field is available and mandatory in the Maternity information system so the data is captured locally. If the system supplier is able to configure it is recognised Homebirth data cannot be included currently due to no hospital spell on the Electronic Patient record. (This issue will be addressed during the implementation of the New MIS - planned 'go live' date March 2022).	Unable to provide assurance on the date when this data will be submitted due to reliance on MIS provider. Support call requested with system supplier -26th April 2021. However if the system supplier is able to configure it is recognised Homebirth data cannot be included currently due to no hospital spell on the Electronic Patient record.	NHSD still to publish requirements. Until these are published it is difficult to provide assurance on passing this CQIM. At 36 weeks data is collected for CO readings & smoking status for Care activity table.	
CQIMTears	Fail	CQDQ21- Provider has at least one 3rd or 4th degree tear recorded in the previous 6 months reporting period. BTHFT first submission of this data was for the December 2020 data. Data is now published monthly so this CQIM should be achieved in the next reporting period. Data warehouse team will undertake further validation to ensure SNOMED-CT code mapping within the maternity information system.	First submission was December 2020 and plan to continue to Submit.	Maternity Information system records tears 3A,3B,3C or 4th Degree as this is what is required to manage the incident effectively. However only SNOMED-CT codes available for 3rd Degree or 4th Degree tear. Data warehouse team are now manually changing the SNOMED mapping.	SNOMED Codes 10217006 & 399031001 first submitted in MSD302 for June Freeze and July Flex following SNOMED Mapping of the Medway data. Experimental MSDS Dashboard for June is showing CQIMTears as Failed (most likely because Numerator is only 10 so below data quality threshold). Maternity Services Monthly Statistics June 2021: Data Quality CSV for RAE shows PASS for the related CQIM though. CQIM_Rate shows Low DQ for CQIMTears.
CQIMVBAC	Pass	This data will continue to be submitted.
