

Board Assurance Framework – Summary of Strategic Risks

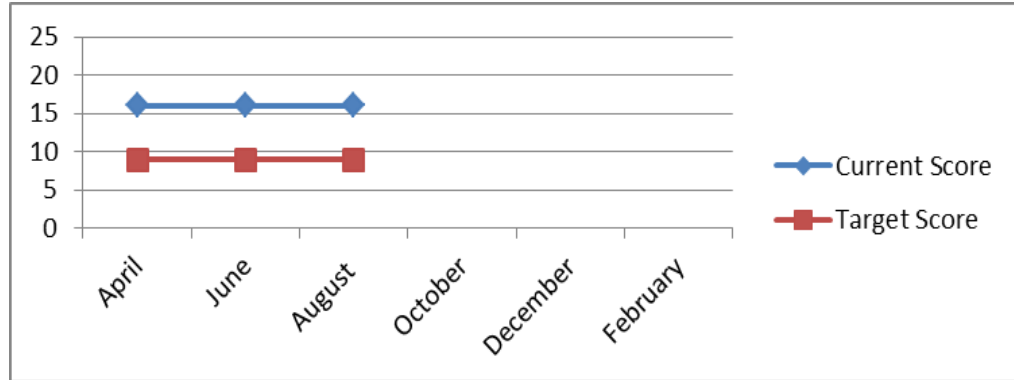

Ref	Strategic Risks	Current Score & Direction of travel	Target Score	Executive Lead	Commentary (e.g. change in risk score, completed actions, reasons for any delays in actions)
Strategic Objective 1 - To provide outstanding care for our patients, delivered with kindness		Assuring Academy: Quality & Patient Safety			Overall Assurance Level 2022/23:
Risk appetite: Open – We are willing to consider all potential delivery options and choose while also providing an acceptable level of reward					Q1Q2Q3Q4
1.1	If we fail to understand the needs of our population, then we won’t be able to deliver appropriate services that address those needs, resulting in worsening health inequalities	8↔6		Chief Nurse / Chief Medical Officer	No changes to note.
1.2	If we don’t have the right staff in the right place with the right knowledge, skills and expertise, then we won’t be able to deliver effective services, resulting in unsafe care, poor patient experience and outcomes	16↔9		Chief Nurse / Chief Medical Officer	No change to overall risk score. Staffing across areas remains closely managed. Nurse staffing vacancies peak in summer months and holidays often see limited availability of temporary staff to mitigate. Higher than expected sickness absence levels continue. Additional services for elective on board with continued pressure of non-elective demand.
1.3	If we fail to maintain and develop our care environment, then we may not be able to deliver modern, outstanding care for our patients, resulting in poor patient experience and outcomes and limited ability to deliver services	9↔12		Chief Nurse / Chief Medical Officer	Funding agreed to enhance single side room provision and IPC compliant estate.
Strategic Objective 2a – To deliver our financial plan		Assuring Academy: Finance & Performance			Overall Assurance Level 2022/23:
Risk appetite: Open – We are willing to consider all potential delivery options and choose while also providing an acceptable level of reward					Q1Q2Q3Q4
2a.1	If we continue to face financial challenges associated with cost inflation, increased demand for services and System/Place affordability, then we may fail to maintain financial stability and sustainability, resulting in reduced opportunities to meet demand and to improve the quality of care, potential regulatory action, and a negative impact on the Trust’s reputation.	12↔8		Director of Finance	Gateway 1 secured in identifying 50% of the financial improvement target
2a.2	If we fail to manage Income & Expenditure within planned parameters, then we may have insufficient cash and liquidity resources to sustainably support the underlying Income & Expenditure run rate, resulting in an impact on operational decisions, and capital investment.	8↔8		Director of Finance	Income and Expenditure run rate remains on plan at the end of Q1
2a.3	If the capital funding allocation from the ICS is not sufficient to meet our requirements and/or we are unable to deliver our capital programme in full by the end of the financial year, then we may not be able to make the capital investments required to maintain safe and sustainable services, resulting in a negative impact on the quality of care, potential regulatory action, and a negative impact on the Trust’s reputation.	12↔8		Director of Finance	Final 2022/23 Programme approved at July meeting of Board of Directors. Risk description updated to reflect the emerging risk around deliverability of programme due to supply chain issues (i.e. can full allocation be spent in 2022/23).
Strategic Objective 2b – To deliver our key performance targets		Assuring Academy: Finance & Performance			Overall Assurance Level 2022/23:
Risk appetite: Cautious - We have a preference for safe delivery options that have a low degree of residual risk and only a limited reward potential					Q1Q2Q3Q4
2b.1	If the Trust is unable to transform its services, then we may not be able to deliver resilient services that are fit for the future, resulting in a loss of staff, and a negative impact on patient safety, experience and outcomes	16↔9		Chief Operating Officer	No change to risk score actions progressing as planned.
2b.2	If the Trust continues to be impacted by COVID-19 and/or is unable to manage the backlogs caused by previous waves, then we may not be able to deliver our key performance targets, resulting in an adverse impact on patient safety, patient experience and potential regulatory action	16↓12		Chief Operating Officer	Risk score reduced from 20 to 16. Covid continues to impact on operational delivery however improvements noted across a number of areas e.g. RTT 104, 78 week waits and cancer treatments. Board approval of circa £16m to deliver Covid recovery.
Strategic Objective 3 – To be one of the best NHS employers, prioritising the health and wellbeing of our people and embracing equality, diversity and inclusion		Assuring Academy: People			Overall Assurance Level 2022/23:
Risk appetite: Seek - We are eager to be innovative and to choose options offering higher business rewards (despite greater inherent risk)					Q1Q2Q3Q4
3.1	If we are unable to recruit to our vacancies, then our current staff will be placed under additional pressure and we may be unable to provide safe staffing levels, resulting in an adverse impact on patient safety and experience, staff experience and wellbeing, and an increase in staff turnover	16↔9		Director of HR	No change to overall risk score. Staffing across areas remains closely managed. Nurse staffing vacancies peak in summer months and holidays often see limited availability of temporary staff to mitigate. Higher than expected sickness absence levels continue. Additional services for elective on board with continued pressure of non-elective demand.
3.2	If we are unable to maintain a healthy workforce, then we will be unable to reduce sickness absence and turnover rates, resulting in an adverse impact on patient safety and experience, and staff experience and wellbeing	12↔9		Director of HR	No change to overall risk score
3.3	If we are unable to recruit, retain and develop a workforce at all levels that is representative of the population we serve , then we may have low levels of staff engagement and morale, resulting in an adverse impact on patient safety and experience, staff experience and wellbeing, and a failure to attract staff to work for our Trust	9↔6		Director of HR	No change to overall risk score Data next updated in November 2022 to reflect the position up to 31 October 2022
Strategic Objective 4 – To be a continually learning organisation and recognised as leaders in research, education and innovation		Assuring Academy: Quality & Patient Safety			Overall Assurance Level 2022/23:
Risk appetite: Open – We are willing to consider all potential delivery options and choose while also providing an acceptable level of reward					Q1Q2Q3Q4
4.1	If it is not possible to fill rota gaps or provide experienced trainers, then we may fail to provide an appropriate learning experience for trainees, resulting in an adverse impact on our reputation and potential withdrawal of the Trust’s training accreditation status	12↔6		Chief Medical Officer	Action plans in place to address the training issues associated with the pandemic. Improved medical and nursing staff levels predicted from September onwards.
4.2	If we fail to attract research funding and researchers to BIHR, then our research capacity and capability will be negatively impacted, resulting in a negative impact on patient care and population wellbeing, and the Trust’s reputation as a leader in research	6↓6		Chief Medical Officer	Score reduced from 9 to 6 following recent successful funding bids of £5.8M and £5M. BIHR continues to attract investment and high level research staff.
4.3	If we do not have robust processes for incident identification, escalation and learning then we may fail to learn from incidents, resulting in gaps in safe clinical care	12↔8		Chief Medical Officer	New PSIRF now released and implementation process begun. Learning from deaths processes well-established.
Strategic Objective 5 – To collaborate effectively with local and regional partners, to reduce health inequalities and achieve shared goals		Assuring Academy: N/A - Board			Overall Assurance Level 2022/23:
Risk appetite: Seek - We are eager to be innovative and to choose options offering higher business rewards (despite greater inherent risk)					Q1Q2Q3Q4
5.1	If we do not effectively identify, develop and implement opportunities for collaboration and alignment across the ICS, then we may fail to deliver seamless, integrated care for the people of West Yorkshire, resulting in poor patient and staff experience, poor outcomes for patients, and missed opportunities to address health inequalities.	9↔6		Director of Strategy & Integration	No changes to note.
5.2	If we do not effectively influence implementation of the Strategic Partnering Agreement and other elements of system integration in our Bradford District & Craven place, then we may fail to deliver seamless, integrated care for the people of Bradford District and Craven, resulting in poor patient and staff experience, poor outcomes for patients, and missed opportunities to address health inequalities.	9↔6		Director of Strategy & Integration	No changes to note.

<ul style="list-style-type: none">• Pre planning and visibility on high risk investment requirements.• List of risk stratified prioritised long list of investment requirements has been established.• Intensified oversight and governance of the capital programme via Capital Strategy Group and Capital Operational Group.• Project phasing or the bringing forward of projects to manage the overall quantum.• Re-purpose existing capital allocations elsewhere in overall programme to support risk.• Look to source alternative income flows to support the investment plan that do not impact on CDEL (eg charitable donations).• Small contingency retained for emergency capital requirements		Internal Positive: <ul style="list-style-type: none">• Monthly Finance Report , latest as at May 2022• Monthly F&P Academy Dashboard, latest as at May 2022• Bi-Annual Treasury Management Report, latest May 2022• Capital Plan approved by 2022/2023 – Board of Directors July 2022 Negative: N/A		Independent Positive: Internal Audit reports: <ul style="list-style-type: none">➤ Capital Projects – Significant assurance (May 2022) Negative: N/A		Gaps in control As at 29.4.22, the final capital allocation has been agreed. The allocation of the quantum on a risk prioritisation basis is yet to be confirmed. The delay in agreeing the allocation may pose a challenge to spending the full allocation in year, particularly for any build schemes, given the current economic and supply chain environment. At the beginning of August 2022, lead times, supply chain issues and bed pressures are compromising the ability to spend the full allocation in a number of areas (eg Digital, Single isolation rooms). In additional a contingency allocated for a perceived risk in medical equipment has been mitigated. As such and without mitigation the potential underspend is forecast to be £4m, which will adversely impact on the programme for 2023/24 as at least £2.8m of the £4m will be required in 2023/24.		Action Prioritisation of the requests on a risk basis that aligns to the Trust’s allocation Risk stratification of ‘need’ and subsequent profiling of plan to determine if items can be safely deferred 2023/24 ETM to consider range of options to mitigate risk with a particular focus on items that would have been included in the 23/24 programme		Timescale Complete Ongoing throughout year ETM discussion 22 August
