Initial feedback	Areas for improvement
	Oversight of the waiting area for patients waiting for the maternity assessment centre remains a concern. We have identified some similar findings from the last inspection of maternity services relating to medicines management which we are reviewing. We will ask for additional information relating to cleanliness and medicines to support our review of these areas.
	Positive findings
	We recognised the service has undertaken a lot of work with theatre environment and flow. We heard about a perceived positive shift in incident reporting culture We heard about and saw positive multidisciplinary relationships in maternity services.

Could I take this opportunity to thank you once again for the arrangements that you made to help organise the inspection, and for the cooperation that we experienced from you and your staff.
