

We Are Bradford:

2025/26 at-a-glance

Bradford Teaching Hospitals
NHS Foundation Trust

Our year – in numbers

667,000 size of population served

Over **7,500** employees

594,445 outpatient appointments attended

163,338 A&E attendances

5,200 babies born

14,200 operations performed in theatres

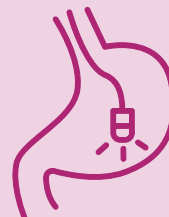

£686.9m annual income

Our year – in highlights

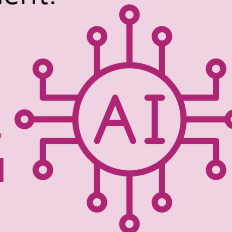

NHS England ranked us the **highest performing trust** in West Yorkshire and among the top half of acute trusts nationally.

Maternity services and outpatient services at St. Luke's achieved a **'Good' rating** from the Care Quality Commission (CQC).

Our new £25m endoscopy unit welcomed its first patients, **increasing diagnostic capacity** and supporting earlier diagnosis and treatment.

We expanded the use of digital technology and artificial intelligence in radiology to support **faster diagnosis** and **improved outcomes**.

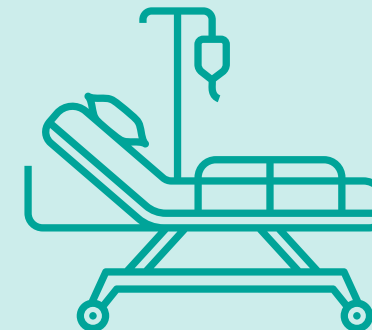

The Commercial Research Delivery Centre was launched, strengthening our role in **developing future treatments**.

Did you know...?

More than **232** active volunteers support our services.

We remained among the **best-performing hospitals** in England for emergency care during 2025/26.

We provide **617** acute beds and **145** maternity and neonatal beds/cots across our hospitals.

Our Community Diagnostic Centre at Eccleshill now provides all commissioned diagnostic tests **in one place**.

Improving our quality of care: 2025/26

Our year of quality in numbers

More than **16,900** patients took part in our research and helped shape the future of healthcare

1,200 colleagues accessed our Ramadan support and Fast Packs, helping us create a more inclusive environment

57,000 interpreting sessions delivered, supporting our diverse communities in over 60 languages, plus 900 British Sign Language sessions

27 concerns raised by colleagues, patients and families led to rapid clinical reviews through Martha's Rule

Our new endoscopy service achieved **JAG accreditation**, recognising the high standards of care, patient safety and clinical quality delivered by our teams

Progressing our priorities in 2025/26

1. Management of deteriorating patients: Continued implementation of Martha's Rule and strengthened safety oversight through executive-led daily safety huddles and weekly Quality of Care Panel meetings.

2. Maternity and neonatal services: Delivery of the Maternity and Neonatal Improvement Plan to improve safety, outcomes and personalised care for families.

3. Patient safety and clinical governance: Further development and embedding of our Patient Safety Incident Response Framework (PSIRF) including the establishment of measures to assess its effectiveness.

New priorities for 2026/27

1. Learning Disabilities and Autism: Improve personalised care, reasonable adjustments and support for people with learning disabilities and autistic people.

2. Workforce Planning: Strengthen workforce planning, wellbeing, retention, training and career development.

3. Enhanced Therapeutic Observations and Care: Improve the safety and experience of patients through compassionate, personalised observation and care.

4. Maternity Learning: Strengthen maternity safety by learning from incidents, improving teamwork and listening to families.

5. Harm Reduction and Prevention: Reduce avoidable harm through better hip fracture care and stronger infection prevention and treatment.
